

CS2710 Homework Assignment 6

Due: Wednesday, December 19, 2012.

Part 1: Book problems

Exercise 2.10, parts 1, 2, 3, 4, 5, 6, only doing the b part.

Exercise 2.11, parts 1, 2, 3, 4, 5, 6, only doing the a part.

Part 2:

Write a MIPS assembly language program which will take a constant number of your choosing (hardcoded in the code), print it out to the console, square the number, take the 2's compliment, and print the result out to the console.
